Love

Although we're individual Selves,  
unable to read each Other's Minds,  
unable to feel One Another's pain,  
Love is sure that we can put Ourselves in Another's place.  
Share in Another's Wonder. Sense Another's sorrow and grief.  
Love moves us to Friendship, to believe in Community.

We all have some experience with Love.  
We each know what we mean by it.  
Although Love is arguably what's most important to us,  
we really don't know what it is.

Some say Love is a Garden.  
An inner Truth all People have.  
Some conceive Love as a Force.  
Even that Love is all there is.

People express their Love in more ways than there are Stars.  
Love grows Self-Respect and Respect for Others / forgives mistakes / pardons hurt.  
For Some, Love has no words.  
For Others, just four letters.

Love waits in the shadows pathways cross  
for a moment of Equality, Respect, Relationship.  
Love brings traces of the Infinite.  
In its throes or in a fragment of its bliss — Eternity.

Love means answering the needs of our Living Planet.  
Love is prioritizing Everyone being cared for, no Child hungry.  
Love translates into Others, Nature, our Mother Earth  
being more important than Money.

Given how Love overcomes every obstacle,  
it makes sense we think Love Divine.  
As it turns out,  
the Survival of our Species hinges on Love.

with Love  
we can successfully negotiate this Phase Transition.  
Create the World all our Hearts desire.
