Peace

There came Peace on Earth,
Humans turned their swords into plowshares,
not one Child hungry.
Life drank again waters from the rivers
fishes animals plants landscapes once more held sacred,
when from promises broken
a once-divided Species rose unified
believing One Another capable
the dream from cradle kept
the vision every heart at one time whispered.

imagine
a non-violent, Womensafe World,
true to every Child's trusting eyes.
Nations secure in One Another's presence.
The World, the People, no longer hostage to might-makes-right.
A Planet where Wealth is freely shared.
No one taking more, while Others are in need.
People believing in and working for the Common Good.

Peace suggests Reason serving Love.
Egalitarian Relationships among us. A Pluralistic Society.
A sustainable and healing relationship with our Planet.
Institutional Change following upon democratically made choices.

The idea of Peace on Earth
prefigures the Humans finding their place in the Universe.

come wind who inspires the dove her shore
floats leaves softly to their rest
carry us drifts of garden music
lotus blossoms / wedding bells
