

what the devil

It's important to understand the difference
between physics and metaphysics.
Science investigates Matter, the measurable. Physical phenomena.
Metaphysics studies what might make things possible.
Its explanations are not physical descriptions.

take the devil

A character men long ago invented with singular purpose:
to explain why there's evil in a World created by an All Good God.
To make a long story short, the devil wants only one thing from us —
and that's for us to keep the bargain that we made with him.
We do his bidding and he gives us a taste.
A taste of the knowledge of good and evil

But no one likes being told what to do,
so the deal had to have us thinking that we were doing our own bidding;
by believing the devil's explanations for our troubles.

The Climate Crisis will pass.
You make Peace by waging War.
The Poor at fault for Poverty.

Time to be rid of the devil / recognize a better explanation
the evil in the World that we're talking about
results from what we permit ourselves to think, say and do.
When Culture informs the Ego Idea with Self-as-Separate Narrative
what follows is what we've got.

Time to dissolve the contract
tell the devil we've had enough
cut the chains / free our Minds
create so much generosity / kindness / compassion
do so much good. make so much love.
we turn from making war
begin healing our Planet / taking care of One Another
the Garden Gate creaks open
