

Brandon

Golden damselfly / soaring windhover,
Stirring clouds / fields of clover –
Making changes inside out,
The altruism our cells are about.

Were it up to you, we'd end hunger,
Wealthy turn their money to loving wonder –
Breath of innocence / art of living,
Pursuit of happiness / joy of giving.

Your words house our aspirations,
Inspire human celebrations –
Nature held sacred / men melting their guns,
Aquarian goodness in megatons.

Gracious host / invisible guest,
Revolutionary reasoning / fate blest –
One looks to you for guidance from here,
If only for an evening none more dear.
