Campfire embers / forest sigh,  
Stars spill across the sky –  
Uncommon love in a catch of dream,  
Tunneling time turned sacred meme.

Thought impossible gives you smile,  
Persisting presence / mountain style –  
Sending waves through the narrative field,  
Let the epiphany come unsealed.

And the vision for which you stand,  
Peace and happiness through all the land –  
Equality / Truth / Universe mending,  
The moral arc parabolically bending.

Egoism's fears have made us frail,  
Science says complex networks can fail –  
Saturn suggests a key of great worth,  
Find in the Actual / get down to Earth.
