

# Emily

**C**ought in a sudden summer shower,  
City mind scape afternoon hour –  
Sending chalk marks softly dreaming,  
People scurrying / streets steaming.

**T**aking shelter neath a sidewalk shed,  
Out of nowhere talk a world of instead –  
Altruism / sisterhood / planetary delight,  
Real possibilities at the edge of sight.

**h**oly dripping / catches blue,  
Glorious sunlight breaking through –  
No algorithm for your wild unpredictable,  
Warm confident scientifically inexplicable.

**S**aturn suggests it might take magic,  
To rescue the millions all facing tragic –  
Here in the last act / closing scene,  
Where humans decide what Life will mean.
