

Todd

Down the road past geometrics,
Rainbow fields supersymetrics,
All those possibilities below above –
Sweet improbable garden love.

Pays the price to cross the bridges,
Taking tomorrow past desert ridges,
Remembering everything time forgot –
Holy springs almost too hot.

Imagine water dancing with moonlight,
One guitar filled extra-long night,
Something wondrous in the air –
But what's that sign say over there?

Longside the crystal sparkling stream,
Next the stargate, know where I mean –
Can you read what it's trying to say?
Something about our world today?
