Nebulae border your Invitation,
Life at daybreak, moment from Creation –
Green silk meadows, dandelion sunny,
Sounds from the Land of Milk and Honey.

Stories at fingertips, puffy cloud skies,
Dark chocolate, endless surprise –
Friends everywhere, music, dance,
A real Probability the Planet a chance.

Cardamon flavored, Garden Soul,
Everything needed to make Earth whole –
Reason fused with Science-based knowledge,
It's not too late / yet close to the edge.

Arms race, climate crisis, inequality,
Might take a Miracle to heal our Reality –
Saturn's comment on fixing what's broken,
Seems the Patriarchy resents being woken.
